DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 10-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Evans et al. (US 5,971,806).

Regarding claim 10, Evans et al., fig. 1-6, discloses a removable electrical plug-in connection comprising a connector 10 and a mating connector (not shown), the mating connector including a contact element 50 having at least one contact area 51 which is connectable at least in part to the connector, wherein the connector includes at least one clamping element 20, 30 which grips at least in part around the contact element 23, 33 in its contact position, and this clamping element presses at least a part of the contact element against the contact area 25, 35 for establishing the electrical plug-in connection.

Regarding claim 11, Evans et al. discloses the clamping element is positioned displaceably within the connector and latches in its contact position.

Regarding claim 12, Evans et al. discloses the clamping element has areas in which the contact element is fixed in its contact position.

Application/Control Number: 10/589,058

Art Unit: 2839

Regarding claim 13, Evans et al. discloses the clamping element has latching means with which the contact element latches together.

Regarding claims 14 - 17, Evans et al. discloses the clamping element is designed in such a way that the contact element is fixed in its longitudinal extension on at least one side of the contact element at least in part in the contact area.

Regarding claims 18 - 21, Evans et al. discloses the contact element is pressed against the contact area of the contact element when the connector, made up of a contact element, a contact carrier and a clamping element, is closed.

Regarding claims 22 - 26, Evans et al. discloses the contact element has a sleeve (not labeled) at least in the contact area for compensating different diameters of contact elements.

Regarding claim 27, Evans et al. discloses the sleeve has at least one contact point on its outer surface which is at a distance from the diameter of the sleeve which comes into contact with the contact area 51 of the contact element 50.

Regarding claim 28, Evans et al. discloses the sleeve can be plugged directly onto the end of a cable.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vladimir Imas whose telephone number is 571-272-8288. The examiner can normally be reached on 8:00 a.m. to 5:00 p.m..

Application/Control Number: 10/589,058

Art Unit: 2839

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T. Patel can be reached on 571-272-2098. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
